Collectify Home Inventory Edition, the new standard in home inventory software.

Finally! Recording the contents of your home is made fast and fun with Collectify Home Inventory Edition and your digital camera. Never before has peace of mind been so easy!

Collectify Home Inventory Edition is a software solution brought to you by Collectify™, the definitive choice for cataloguing and managing the world's finest collections and collectibles. Endorsed by international auctioneers Sotheby's, Collectify™ is proud to be an alliance partner with some of the largest and most respected insurance providers. Artists, appraisers, brokers, dealers, and collectors the world over look to Collectify™ for their cataloguing needs.

Now Collectify Home Inventory Edition is the new standard for homeowners and tenants who value their family's possessions and want to preserve their worth against loss.

Because the best way to outwit disaster is to be prepared – before it strikes!

Fast

Tedious spreadsheets are a thing of the past. Thanks to two revolutionary new data entry tools – Quick Image™ and Quick Entry™ – inventorying your possessions has never been so fast and intuitive!

Easy

Get a head start on your inventory with your digital camera – save the images in Collectify Home Inventory, add a few details, a value, and you're done.

Or simply select the objects in YOUR house from a list of objects common to most households and add photos later.

If you've already started an inventory spreadsheet, there's no need to re-enter your data into Collectify Home Inventory. Our import utility does it for you.

Share your inventory with your insurance company, by email or with a colorful printed report, in three mouse clicks.

Flexible

Customize your inventory to list the rooms in YOUR home, with the names you prefer.

Never lose another receipt, warranty, or manual.

Store photos, video and audio to completely record your home, its contents, its structure, and the surrounding property.

Or, use it to help inventory your business office: Everything from computers to desks to wall hangings – even potted plants!

Comprehensive

Build a complete summary of your possessions. Record serial numbers, receipts and warranties, purchase prices and appreciation values – and back it up with photos. Store all the details of your home and property including structure, appraisals, documents, lot size, taxes, and utilities.

Keep a copy of your policy and its details and even prepare an insurance claim.

Estate planning: Does your family know what YOU know about your possessions? Decide who gets what and when.

Dollars, Euros, Yen – use whatever currency you prefer.

And the software resides only on your computer – not on the web – so privacy is assured.

...Prepared

Emergency measures organizations recommend having a family plan in case of a need to evacuate.

Collectify Home Inventory Edition is so complete you can store phone numbers, financial details, and photos of family and pets – critical information at your fingertips in case you become separated while on the run from the unexpected.

And since your inventory is digital, a copy can be emailed to a friend for safekeeping.

Discover Collectify Home Inventory Edition and how easy it is to safeguard all your household possessions against loss – before disaster strikes!
