

D I S C O V E R

The most comprehensive cataloguing software at the most affordable price.

Collectify is easy and friendly and the perfect solution for any collector, even if you've never recorded a thing about your collection. And yet...

Collectify is the definitive choice for cataloguing and managing the world's finest collections and collectibles. Endorsed by international auctioneers Sotheby's, Collectify is proud to be an alliance partner with some of the largest and most respected insurance providers.

Collectify has a depth of capability and customization unmatched by other software. Artists, appraisers, brokers, dealers, and collectors the world over look to Collectify for their cataloguing needs.

And it's the perfect way to discover the rewards of cataloging!

When you Collectify your possessions, nothing goes unknown!

Whether your collection is monumental or just a few choice pieces, Collectify is the software solution for getting more from the things that matter to you.

If you boast a collection of valuable art and antiques, or if you simply love your porcelain figurines, tracking the status and whereabouts in real-time of each object is sometimes reduced to guess work. Not anymore. With Collectify you'll always know what you have, where you keep it, and what it's worth.

Easy

Collectify makes cataloguing like an expert as easy as filling in a form. Wizards guide you step-by-step so you can finish recording your details in just a few clicks.

From itemizing the object, to profiling the artist, to sending a report to your insurer, wizards are there to walk you through the entire process. It's like having your own personal curator with you at the computer.

Flexible

Any type of collection can be cataloged in Collectify. We offer 33 pre-defined collection types – or you can define your own. Choose from hundreds of collection-specific data fields – or you can define your own. Select one of the 40 report templates – or, of course, you can define your own!

Arrange your data to display only what is important to you, in the order that is most meaningful to you. In short, Collectify can be personalized to perfectly reflect your unique collecting needs.

Comprehensive

Collectify stores all the associated details pertinent to your collection - appraisals, insurance, copies of catalogs and other relevant literature, provenance, and condition. Everything you previously stored in a filing cabinet can now be stored neatly and conveniently in Collectify. And since your collection is digital, a copy can be emailed to a friend for safekeeping.

Build profiles of artists, manufacturers, galleries, framers, restorers, auction houses and other contacts, and link them to the objects in your collection.

Track the location of your objects, even when they are out on loan. Let Collectify remind you when to pick up your piece from the restorer or when to renew your insurance policy. Collectify will even alert you if the value of your collection exceeds your insurance coverage.

And the software resides only on your computer – not on the web – so privacy is assured.

Start with your favorite thing...

- Record a bit of information about it. Then add a little more.
- Write a story about how you acquired it.
- Add an image or two. Link a website. Include the receipt.
- Note its history or special marks.
- Print a colorful report. Make a Slideshow. Email it to family and friends.
- Show your kids part of their cultural heritage.
- Plan your estate. Be sure everyone know what goes on a pedestal and what goes in a garage sale.

Leave a legacy.
